# THE 50 MOST SEARCHED KEYWORDS

## The Roofing Webmasters 50 Most Searched Keywords

At the Roofing Webmasters, it is our goal to target different SEO components in order to rank your roofing company higher in search engines. We do this by focusing on website design, content, social media, coding, and other search engine optimization tactics to get you more success for your business. One of the most important things we focus on is keywords. While keywords might not seem like a big deal, they are actually essential to targeting your specific customers. Consumers will either type in one or two words or a whole phrase when they are searching for a product or service, so it's important to know what keywords consumers are using. Because the Roofing Webmasters have years of experience researching and implementing roofing keywords to SEO and online marketing strategies, we know what keywords work. However, we want our clients to also be aware of what keywords will get them on the first page of search engines, so we put together an eBook called The 50 Most Searched Keywords. Knowing what keywords are searched most by customers looking for roofing services, will give you a better understanding of how a consumer looks for your business, which in turn can help you have a more effective and prosperous company. Below are the the 50 Most searched keywords for roofers.
